About Fleur Atelier

A Digital Booking Experience for Fleur Atelier

Fleur Atelier is a web-based photobooth booking system that allows customers to explore available services and make reservations, while providing administrators with tools to manage the operational data behind the service.

Fleur Story

Fleur began as a simple frontend website inspired by my curiosity about birth flowers.

01 — CURIOUS

I've always loved flowers and became curious about the meaning behind birth flowers.

02 — CREATE

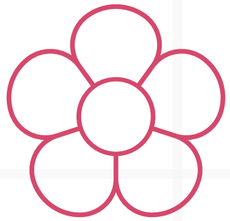

That curiosity turned into a simple website where people could discover the birth flower associated with their birth month.

03 — EXPLORE

After building the frontend, I wanted to take the project further by exploring backend development.

The Idea

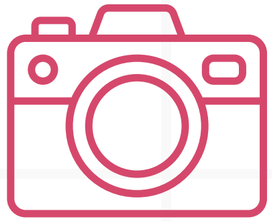

What started as a curiosity about flowers became an opportunity to explore full-stack web development.

BIRTH FLOWERS

Birth flowers became the creative foundation of Fleur.

PHOTOBOOTH

I’ve always enjoyed photobooths and the idea of turning a simple photo into a memorable experience.

=

Fleur Atelier

A fictional photobooth concept inspired by birth flowers.

The Concept

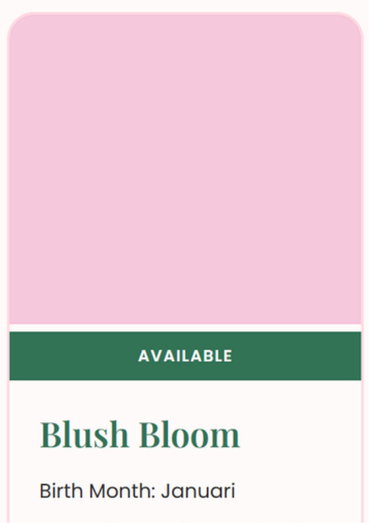

Fleur Atelier is a fictional photobooth brand inspired by birth flowers. Each month is associated with a birth flower, which becomes part of the experience and visual identity of the photobooth.

Turning Birth Flowers into a Photobooth Experience

January is associated with the carnation, a flower often represented through soft pink tones.

The pink background was chosen to reflect the visual character of the carnation for January photobooth.

How Fleur Atelier Works?

1 DISCOVER
Explore the Fleur Atelier concept

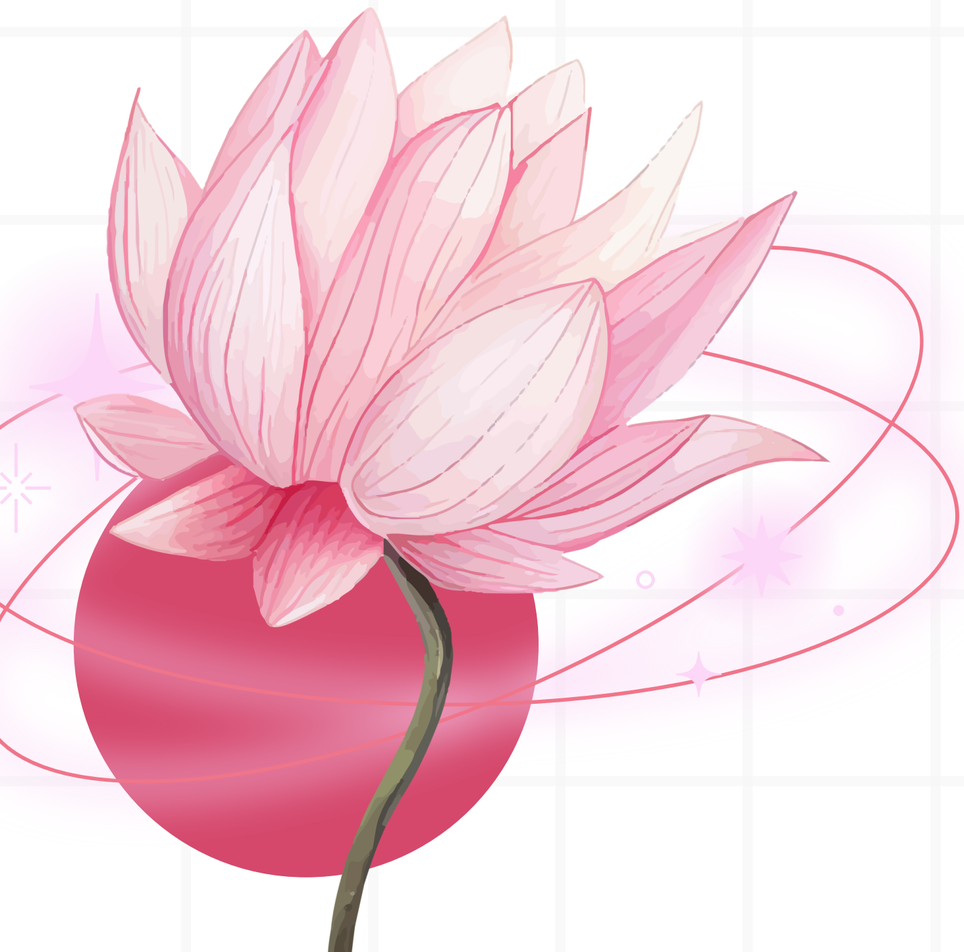

2 EXPLORE
Browse locations & photobooths

3 CHOOSE
Select your preferred experience

4 BOOK
Make a reservation

5 CELEBRATE
Capture your moment

Key Features

Monitor and manage system data

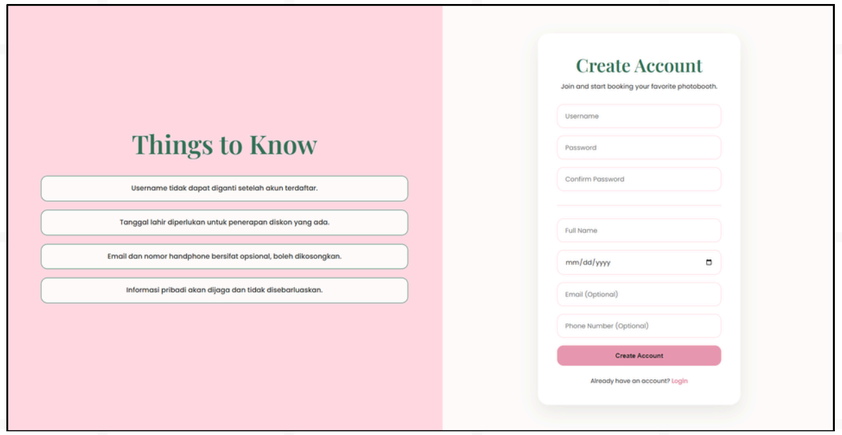

Inside Fleur Atelier

Sign In

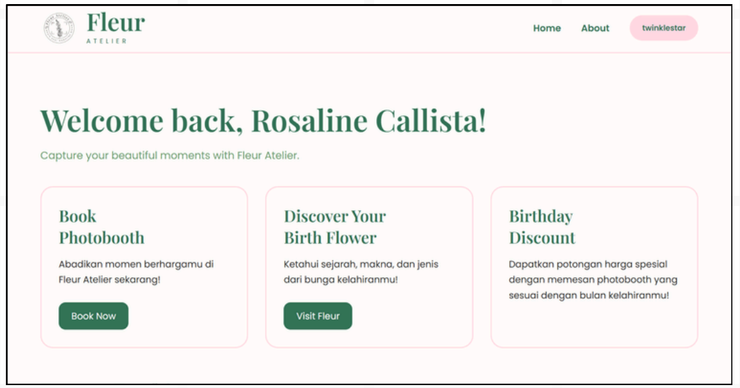

Customers must sign in to access the Fleur Atelier booking experience.

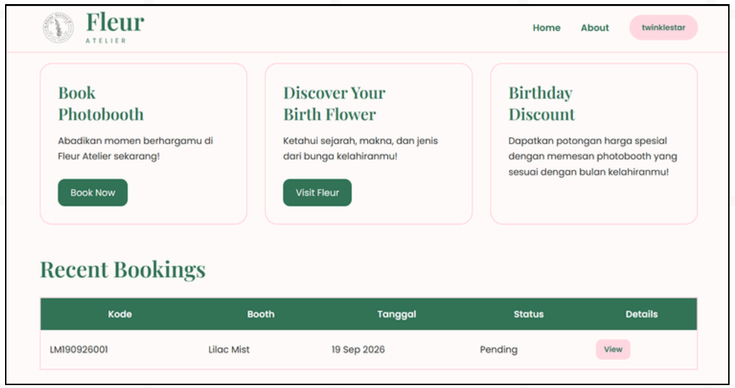

Sign Up

New customers can create an account before accessing the platform.

Inside Fleur Atelier

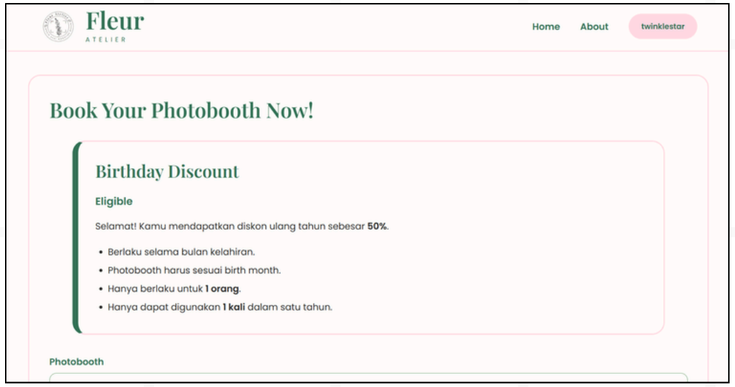

Customers can book a photobooth, discover their birth flower, learn about the birthday discount, and view their recent bookings.

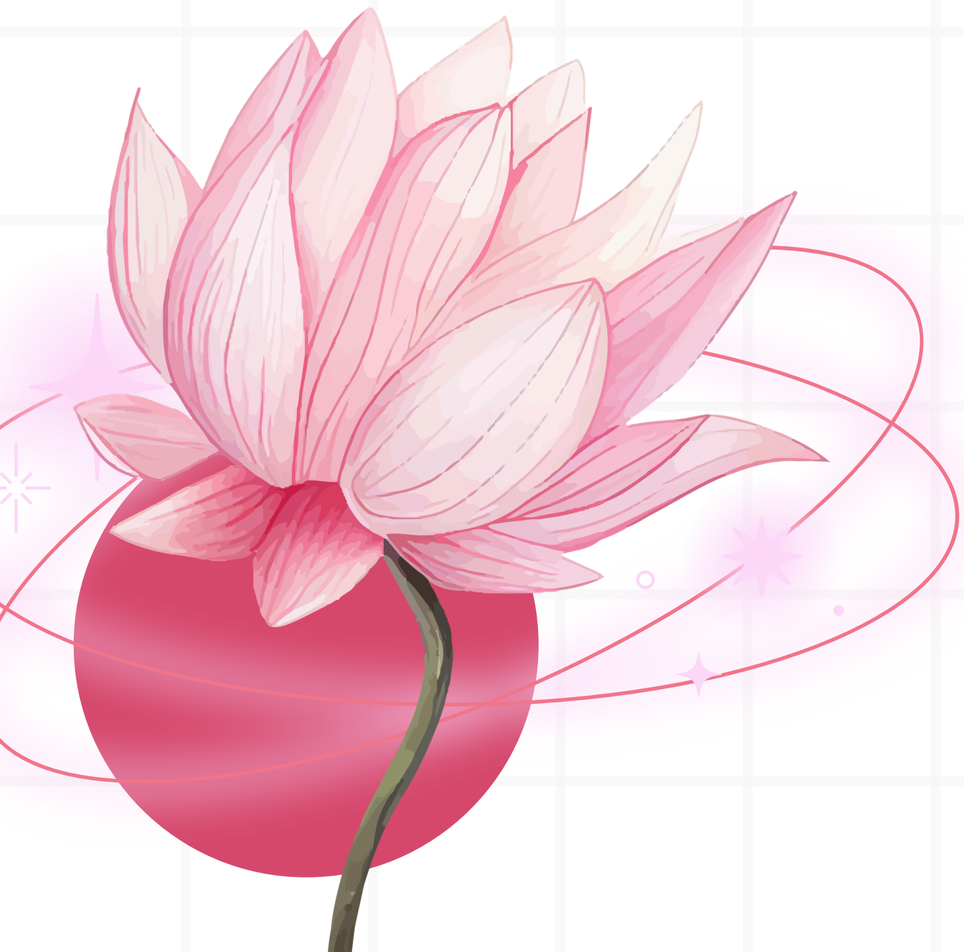

Customers can explore the available photobooths and choose one that matches their preferred experience.

Eligible customers can receive 50% off by booking a photobooth with the background corresponding to their birth flower.

Admin Dashboard

Dashboard

Admin can monitor booking activity through daily, monthly, and overall booking summaries.

Locations

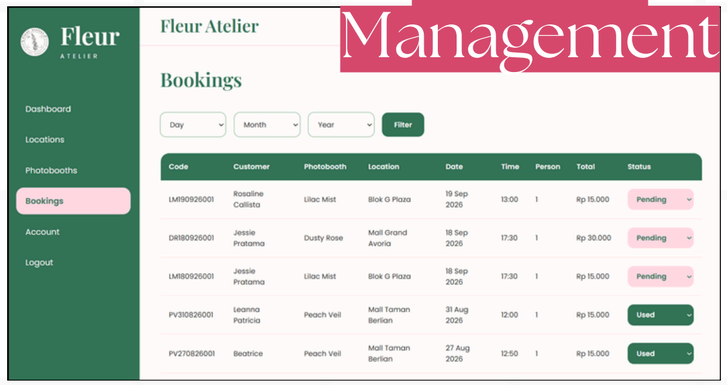

Admin can view and manage the locations where Fleur Atelier photobooths are available.

Photobooths

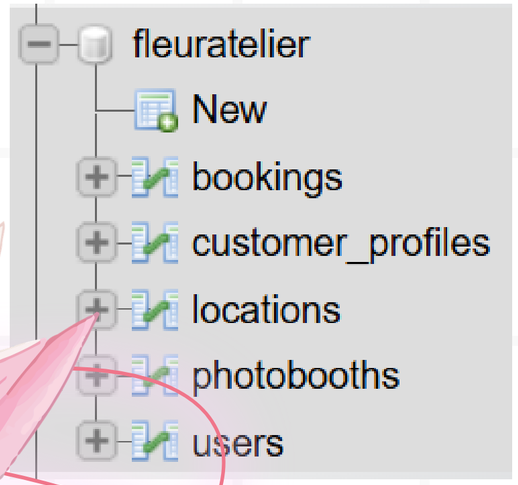

Admin can manage each monthly photobooth concept along with its assigned location.

Booking Management

Admin can view detailed customer bookings and update their status to Used, Pending, or Cancelled.

Data Management

Customer, booking, photobooth, and location data are stored and managed through a centralized MySQL database.

PHP → MySQL → Web Application

	Table	Action	Rows	Type	Collation	Size	Overhead
☐	bookings	Browse Structure Search Insert Empty Drop	11	InnoDB	utf8mb4_general_ci	48.0 KiB	-

Tech Stack

HTML

CSS

PHP

MySQL

XAMPP

phpMyAdmin

The system combines a responsive frontend with PHP-based backend logic and a relational MySQL database.

What I Learned

1. Translating business requirements into functional features.
2. Connecting frontend interfaces with backend logic.
3. Managing relational data using MySQL.
4. Building a complete web application from user interaction to data management.
