# SEVENTEEN

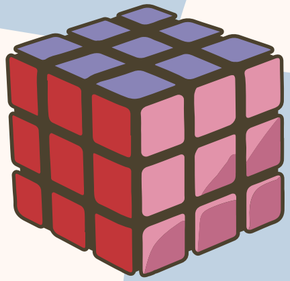

## K-Pop Fan Website

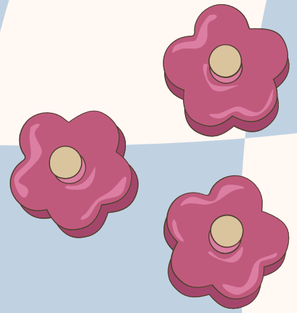

A static website introducing SEVENTEEN, created by adapting an existing Bootstrap website template into a personalized fan-oriented website

# Project Overview

## Purpose

To create a static website based on a predefined website template while applying a completely different content theme

## My Approach

- Adapted the existing Pacific website layout
- Replaced the original content with SEVENTEEN-related content
- Customized sections to showcase members, units, music, and news
- Implemented the website using HTML

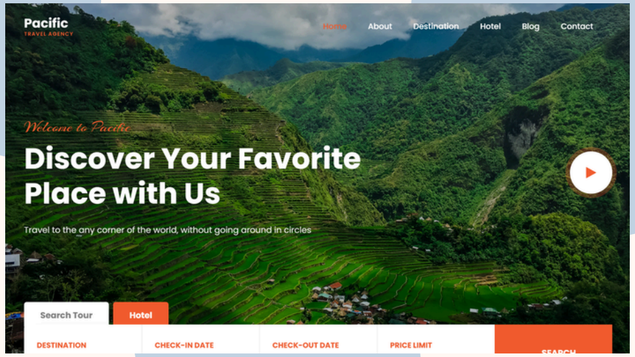

## Output

A responsive static website deployed through GitHub Pages

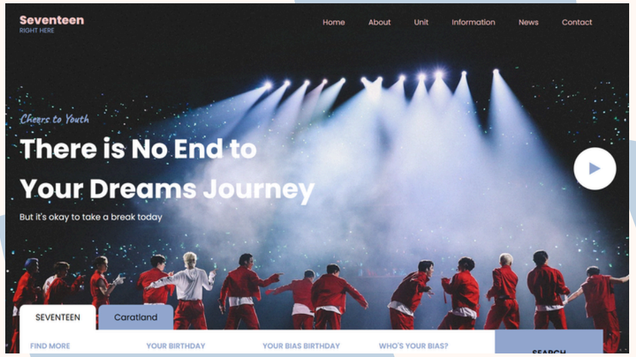

# From Travel To Caratland

The original template was designed as a travel website. I retained its core layout structure while transforming its content and identity into a SEVENTEEN fan website

## Original Template

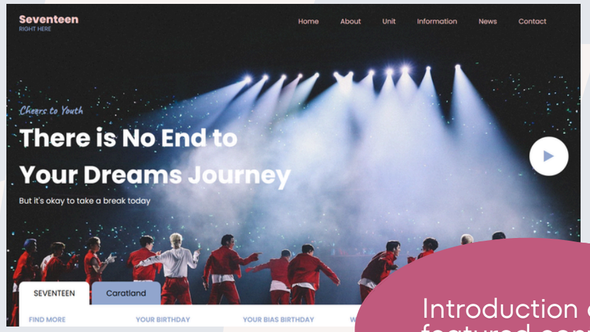

Travel and Tourism

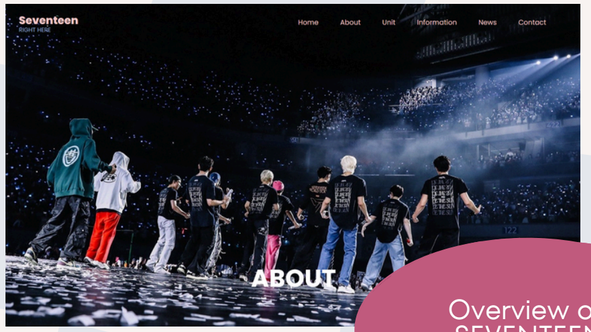

## My Interpretation

SEVENTEEN Fan Website

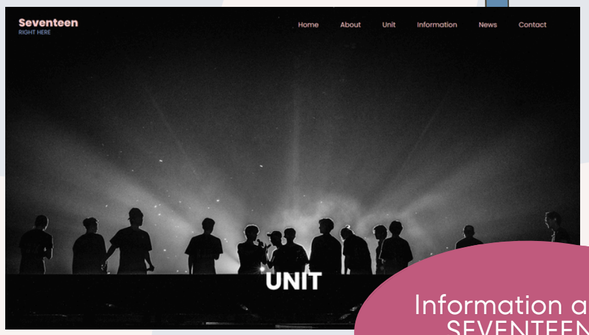

# Website Structure

Introduction and featured content

Overview of SEVENTEEN

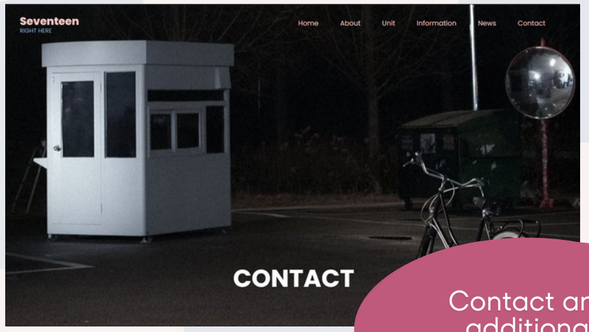

Information about SEVENTEEN's different units

Member and music-related information

Featured activities and updates

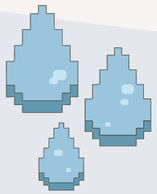

Contact and additional information

# Key Features

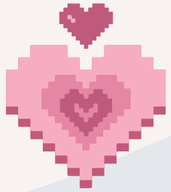

## Music Showcase

Highlights selected SEVENTEEN songs through visual cards and supporting information

## Media Integration

Provides access to external multimedia content through embedded links and YouTube references

## Member & Unit Information

Introduces SEVENTEEN members through different unit-based sections

## News Section

Presents selected updates and activities related to SEVENTEEN

# My Contribution

## HTML Development

Built the website structure and content using HTML

## Layout Adaptation

Adjusted the existing template structure to fit the new content and website concept

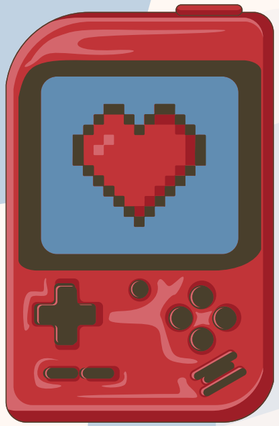

## Content Customization

Replaced the original template content with SEVENTEEN-related information

## Deployment

Published the completed website using GitHub Pages

# Tech Stack

## HTML

Used to structure the website and organize its content

## Bootstrap

Utilized as part of the existing website template and layout structure

## GitHub Pages

Used to deploy and publish the website online

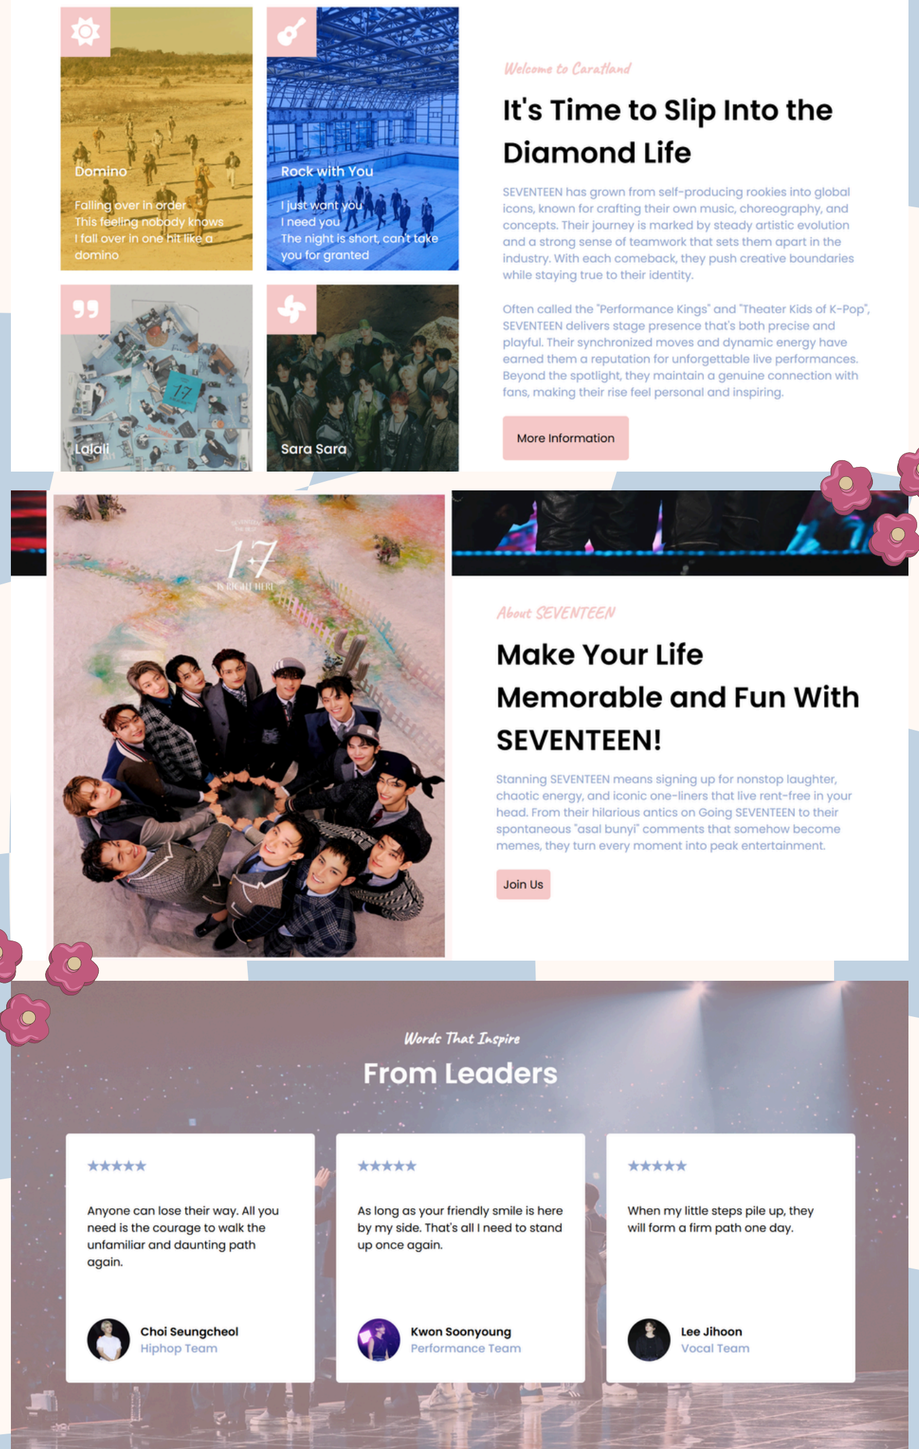

## Project Type

Static Website

## Deployment Focus

Used to deploy and publish the website online

# Final Result

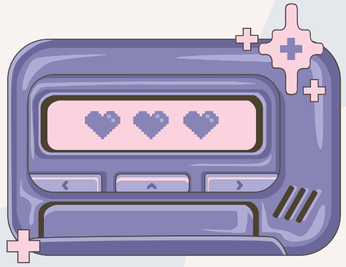

A personalized SEVENTEEN fan website created by transforming an existing travel website template into a new content and visual context

## Website Sections

- Home
- About
- Unit
- Information
- News
- Contact

**View Live Website at Github**

# What I Learned

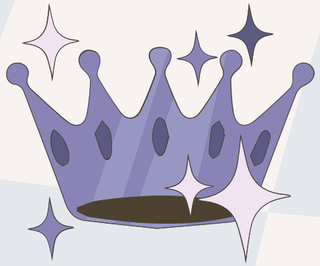

## Understanding HTML Structure

Learned how HTML elements and page structure work together to build a complete website

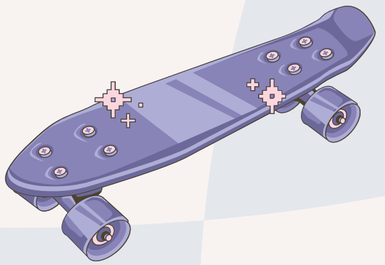

## Working with Existing Templates

Gained experience reading, understanding, and modifying an existing website template

## Content & Layout Adaptation

Learned how to adapt existing layouts to accommodate a completely different content concept

## Web Deployment

Learned the basic process of publishing a static website using GitHub Pages

## Project Takeaway

This project introduced me to the fundamentals of web development and gave me hands-on experience in transforming an existing website structure into a personalized digital experience
